

Modernization Kit ASSA ABLOY M Remote control for industrial doors

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in
door opening solutions

Remote controls to operate overhead sectional doors and folding doors

Key Benefit

Convenience

How it works

Remote controls are ideal for businesses where a few vehicles must access a door several times a day or week. For instance forklift trucks in a production facility or service vehicles that leave and return to their station.

The advantage of a remote control is that it allows to open the door from a distance, without leaving the vehicle.

The remote controls work on 869 Mhz frequency, specially dedicated to door operation systems, so interference of other systems is limited. The remote control has a theoretical range of 100 meters, depending on steel constructions and electronic circuits within the area.

Selecting the correct types

When ordering remote control transmitters and receivers, count the number of doors to be opened and the number of users that need a remote control. Based on this count, select the required number of remote controls and the correct receiver.

Example: If seven doors must be opened by ten people, select ten Robust 869-O8 remote controls and seven DIN or WR receivers.

869 Mhz transmitters

Robust 869-1
Up-stop-down function for one door.

Robust 869-01
One-button function for one door.

Robust 869-5
Up-stop-down function for five doors.

Robust 869-08
One-button function for 8 doors.

Mini 869-999
A small transmitter with up-stop-down function for up to 999 doors.
With display.

Available receivers

Receiver kit DIN (up to 100 transmitters, installation in existing control unit or in relay box)

Receiver kit WR 869 (up to 100 transmitters, delivered in IP65 casing)

Receiver kit AGM WR 869 (up to 500 transmitters, delivered in IP65 casing)

Available kits for ASSA ABLOY M Remote control opener

Name	Type	Remarks
Robust 869-1	Up-stop-down one door	
Robust 869-01	One-button on one door	
Robust 869-5	Up-stop-down five doors	
Robust 869-08	One-button on eight doors	
Mini 869-999	Up-stop-down on 999 doors	
Receiver kit DIN	Up to 100 transmitters	Installation inside in control unit or in relay box
Receiver kit WR 869	Up to 100 transmitters	Installation outside (IP65)
Receiver kit AGM WR 869	Up to 500 transmitters	Installation outside (IP65)
